IN THE CLAIMS

- 1-68. (Previously canceled)
- 69. (Currently amended) A vaccine against *Actinobacillus pleuropneumoniae*, comprising an immunologically effective amount of
- (a) a <u>substantially purified</u> polypeptide comprising the amino acid sequence of amino acid residue 20 to amino acid residue 172 of SEO ID NO:2,
- (b) a <u>substantially purified</u> polypeptide comprising the amino acid sequence of amino acid residue 22 to amino acid residue 215 of SEO ID NO:4.
- (c) a <u>substantially purified</u> polypeptide comprising the amino acid sequence of amino acid residue 28 to amino acid residue 258 of SEQ ID NO:6,
- (d) a <u>substantially purified</u> polypeptide comprising the amino acid sequence of amino acid residue 20 to amino acid residue 364 of SEO ID NO:8, and
- (e) a <u>substantially purified</u> polypeptide comprising the amino acid sequence of amino acid residue 20 to amino acid residue 369 of SEQ ID NO:10; an adjuvant; and a veterinarily acceptable carrier or diluent.
- 70. (Previously added) The vaccine of claim 69, wherein one or more of the polypeptides is a fusion protein comprising a carrier or fusion partner joined to the polypeptide.
- 71. (Previously added) The vaccine of claim 69, further comprising an immunomodulatory component.
 - 72. (Previously canceled)
 - 73-75. (Withdrawn from consideration)
- 76. (Currently amended) A vaccine kit for vaccinating swine against APP, comprising a container comprising an immunologically effective amount of

- (a) a <u>substantially purified</u> polypeptide comprising the amino acid sequence of amino acid residue 20 to amino acid residue 172 of SEQ ID NO:2,
- (b) a <u>substantially purified</u> polypeptide comprising the amino acid sequence of amino acid residue 22 to amino acid residue 215 of SEO ID NO:4.
- (c) a <u>substantially purified</u> polypeptide comprising the amino acid sequence of amino acid residue 28 to amino acid residue 258 of SEQ ID NO:6,
- (d) a <u>substantially purified</u> polypeptide comprising the amino acid sequence of amino acid residue 20 to amino acid residue 364 of SEQ ID NO:8, and
- (e) a <u>substantially purified</u> polypeptide comprising the amino acid sequence of amino acid residue 20 to amino acid residue 369 of SEQ ID NO:10; and an adjuvant.
- 77. (Previously added) The kit of claim 76, further comprising a second container comprising a veterinarily acceptable carrier or diluent.

78-90. (Withdrawn from consideration)
